“Interesting clinical cases in aging and geriatrics”

Presented by:

Salvador Ramos-Camacho, MD
and Betty Lackey, DO

Geriatric Medicine Fellows
Department of Aging and Geriatric Research, College of Medicine, University of Florida
Geriatric Research, Education and Clinical Center (GRECC), NF/SGVHS

Monday, May 20th, 2013, from 12:00 PM – 1:00 PM
HPNP Building - Classroom 1101

Classroom is one floor up, on the east side of the HPNP lobby.

Learning Objectives: At the conclusion of this presentation, participants should be able to discuss the evaluation and management of the following three clinical cases of older adults:

1. “Unusual cause of hypernatremia in an elderly man receiving tube feeding” - This case illustrates an elderly man who developed severe hypernatremia as a result of a malpositioned gastrostomy tube (G-tube) (Dr. Lackey),
2. “Severe and Refractory Pemphigus Foliaceus Unresponsive to Treatment in Elderly Man” - This case illustrates an elderly man with severe refractory Pemphigus (PF) who died from complications of treatment of PF (Dr. Ramos-Camacho).

Drs. Ramos-Camacho and Lackey have disclosed no relevant financial relationships. No one else in a position to control the content of this activity has any financial relationship(s) to disclose.

Continuing Education Sponsors:

UF College of Medicine: ***Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.
