“Research for Novel/Effective Stroke Therapies”

Presented by:

Sylvain Doré

Associate Professor of Anesthesiology, Neurology, Psychiatry and Neuroscience
Director of Research Programs, Department of Anesthesiology
College of Medicine, University of Florida

Monday, April 22nd, 2013, from 12:00 PM – 1:00 PM
HPNP Building - Classroom 1101

Classroom is on the east side of the HPNP lobby and one floor up.

Learning Objectives: At the conclusion of this presentation, participants should be able to:

1. Describe differences from ischemic stroke and hemorrhagic stroke.
2. Identify and test novel neuroprotective anti-oxidant or anti-inflammatory pathways in stroke.
3. Understand the increase risks associated with aging.

Dr. Doré has disclosed that he has no relevant financial relationships with the exception of NIH grant funding. No one else in a position to control the content of this activity has any financial relationship(s) to disclose.
