“Age Differences in Models of Pain Modulation”

Presented by:

Joseph L. Riley, III
Professor, Department of Community Dentistry and Behavioral Science
College of Dentistry
University of Florida

Monday, May 13th, 2013, from 12:00 PM – 1:00 PM
HPNP Building - Classroom 1101
Classroom is on the east side of the HPNP lobby and one floor up.

Learning Objectives: At the conclusion of this presentation, participants should be able to:

1. Describe when older adults are increased risk for recurrent and persistent and pain.
2. Identify sophisticated laboratory tests of pain modulation.
3. Describe evidence for changes in nociceptive system that may results in increased pain in older age.

Dr. Riley has disclosed that he has no relevant financial relationships to disclose. No one else in a position to control the content of this activity has any financial relationship(s) to disclose.
