“Animal models of cognitive aging: Opportunities for intervention”

Presented by:

Mark Baxter, PhD

Department of Neuroscience and Friedman Brain Institute
Icahn School of Medicine at Mount Sinai
Hess Center for Science and Medicine

Monday, November 25, 2013, Noon – 1:00 PM
CTRBL - Classroom 2161

Lunch Provided

Learning Objectives: At the conclusion of this presentation, participants should be able to:
1. Exhibit greater understanding of the use of animal models in the study of cognitive aging.
2. Analyze the current state of nonhuman primate models of the involvement of ovarian hormones in cognitive aging.
3. Compare recent findings on the involvement of acetylcholine in memory function.
