“Insights into the protective effects of IGF-1 on the aging brain”

Presented by:

William E. Sonntag, PhD

Professor and Donald W. Reynolds Chair of Aging Research
Department of Geriatric Medicine
University of Oklahoma Health Science Center

Monday, September 16th, 2013, from 12:00 PM – 1:00 PM
CTRB Building - Classroom 2161
Lunch Provided

Learning Objectives: At the conclusion of this presentation, participants should be able to:

1. Describe the complex role of endocrine and paracrine IGF-1 in the regulation of brain aging
2. Detail the beneficial and deleterious actions of IGF-1 that occur during the lifespan
3. Review potential novel cellular mechanisms through which IGF-1 acts to restore cognitive function

Dr. Sonntag has disclosed no relevant financial relationships. No one else in a position to control the content of this activity has any financial relationship(s) to disclose.

Continuing Education Sponsors:
