“The Development and Potential Applicability of iPS Cells in Aging Research”

Presented by:

Anna-Maria Joseph, PhD

Assistant Research Scientist
College of Medicine
Department of Aging and Geriatrics
University of Florida.

Monday, May 5th, 2014, Noon – 1:00 PM
CTRB - Classroom 2161

Lunch Provided

Learning Objectives: At the conclusion of this presentation, participants should be able to:

1. Describe induced pluripotent stem (iPS) cells and compare their phenotypic and metabolic properties to embryonic stem (ES) cells.
2. Identify current research areas using iPS cells to model disease.
3. Discuss the applicability of iPS cell technology as a model for studying skeletal muscle alterations with human aging and their potential use for stem cell-based interventions.

Dr. Joseph has disclosed no relevant financial relationships. No one else in a position to control the content of this activity has any financial relationship(s) to disclose.

Continuing Education Sponsors:

UF College of Medicine: ***Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.
***Credit: The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
VA: 1.0 hour of Continuing Education credit provided for: VA employees.

UF Office of Continuing Medical Education is NOT reporting CME credits in CE Broker on behalf of faculty. Log into CE Broker at http://www.CEBroker.com to self-report in the tracking system.
