“Cell senescence and autophagy in leukemia”

Presented by:

Claire Drullion, PhD

Research Associate
Sainte Justine Hospital – Charles Bruneau Cancerology Institute
Montréal, Canada

Monday, February 10th, 2014, Noon – 1:00 PM
CTRBI - Classroom 2161
Lunch Provided

Learning Objectives: At the conclusion of this presentation, participants should be able to:
1. Describe molecular action of therapeutics in cancer cell death
2. Demonstrate how apoptosis and autophagy help to overcome resistance to therapeutics
3. Discuss senescence as a barrier against leukemogenesis

Ms. Drullion has disclosed no relevant financial relationships. No one else in a position to control the content of this activity has any financial relationship(s) to disclose.

Continuing Education Sponsors:

UF College of Medicine: ***Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.
