“Dynapenia-Obesity effect on functional and metabolic profiles: what do we know?”

Presented by:

Mylène Aubertin-Leheudre, PhD

Département de Biologie, Université du Québec à Montréal
Centre de Recherche de l’Institut Universitaire de Gériatrie de Montréal
Département de Kinanthropologie, Université du Québec à Montréal
Montréal, Canada

Monday, January 6th, 2014, Noon – 1:00 PM
CTRB - Classroom 2161

Lunch Provided

Learning Objectives: At the conclusion of this presentation, participants should be able to:

1. Review the scientific evidence that muscle mass and strength play different roles in regard to functional capacity or insulin sensitivity in obese elderly people
2. Discuss potential mechanisms related to these phenomena
3. Synthesize research from the LIFE Study to demonstrate the role of exercise on dynapenia in obese elderly.

Dr. Aubertin-Leheudre has disclosed no relevant financial relationships. No one else in a position to control the content of this activity has any financial relationship(s) to disclose.

Continuing Education Sponsors:

UF College of Medicine: ***Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.
***Credit: The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

VA: 1.0 hour of Continuing Education credit provided for: VA employees.

UF Office of Continuing Medical Education is NOT reporting CME credits in CE Broker on behalf of faculty. Log into CE Broker at http://www.CEBroker.com to self-report in the tracking system.
