“Age related outcomes in the acute respiratory distress syndrome: uncontrolled inflammation?”

Presented by:

Clark Files, MD

Assistant Professor
Section on Pulmonary Critical Care Allergy and Immunologic Disease
Department of Medicine
Wake Forest University School of Medicine

Monday, February 3rd, 2014, Noon – 1:00 PM
CTRB - Classroom 2161

Lunch Provided

Learning Objectives: At the conclusion of this presentation, participants should be able to:
1. Explain the increased incidence and reduced functional outcomes of older patients with acute respiratory distress syndrome (ARDS)
2. Demonstrate that lung inflammation is a powerful stimulus for muscle wasting in animals and humans with ARDS
3. Examine age related differential immune responses to exercise in animals with ARDS
