“The role of growth hormone/IGF-1 signaling pathway on insulin signaling pathway and aging”

Presented by:

Michal Masternak, Ph.D.

Associate Professor, Burnett School of Biomedical Sciences
College of Medicine, University of Central Florida, Orlando, FL

Monday, April 28th, 2014, Noon – 1:00 PM
CTRB - Classroom 2161

Lunch Provided

Learning Objectives: At the conclusion of this presentation, participants should be able to:
1. Recognize the role of GH/IGF-1 signaling pathway in regulation of aging and longevity
2. Recognize the role of adipose tissue on inflammation and whole body insulin sensitivity in long-living mutant mice
3. Explain potential correlation between inflammation, insulin action and healthy aging

Dr. Masternak has disclosed no relevant financial relationships. No one else in a position to control the content of this activity has any financial relationship(s) to disclose.

Continuing Education Sponsors:

UF College of Medicine: ***Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. ***Credit: The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

VA: 1.0 hour of Continuing Education credit provided for: VA employees.

UF Office of Continuing Medical Education is NOT reporting CME credits in CE Broker on behalf of faculty. Log into CE Broker at http://www.CEBroker.com to self-report in the tracking system.
