“Pain & Aging: Investigating Consequences, Risk, Resilience, and Possible Targets for Treatment”

Presented by

Kimberly Sibille, PhD

Assistant Professor
Department of Aging & Geriatric Research
University of Florida
Gainesville, FL

Monday, December 1, 2014
12:00 pm to 1:00 pm
Room 2161
Clinical Translational Research Building (CTRB)

Learning Objectives: At the conclusion of this presentation, participants should be able to

1. Relate pain prevalence rates in aging adults and describe how chronic pain creates a biological burden on the system.
2. Illustrate familiarity with developing evidence of risk and resilience factors associated with pain in aging adults.
3. Identify clinical targets in early stages of investigation to improve the treatment of chronic pain.
