"Independent People: The Role of Hypoxic Signaling in Chronic Lung Disease"

Presented by

Andrew Bryant, M.D.
Assistant Professor
University of Florida College of Medicine
Department of Internal Medicine
Division of Pulmonary, Critical Care, and Sleep Medicine
Gainesville, FL

Monday, April 20, 2015
12:00 pm to 1:00 pm
Room 2161
Clinical Translational Research Building (CTRB)

Lunch will be provided

Learning Objectives: At the conclusion of this presentation, participants should be able to

1. Explain WHO Group III pulmonary hypertension, and the effect on morbidity and mortality related to idiopathic pulmonary fibrosis
2. Recognize how hypoxic-signaling influences the development of pulmonary hypertension
3. Inventory potential therapies for Group III pulmonary hypertension, related to hypoxic signaling pathway

CME Information:

Accreditation:
The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit:
