“A Tale of Two Synaptic Disorders: Fragile X-Associated Tremor Ataxia Syndrome (FXTAS) and Early Alzheimer’s Disease”

Presented by

John M. Olichney, MD
Professor
Department of Neurology
University of California, Davis

Monday, February 23, 2015
12:00 pm to 1:00 pm
Room 2161
Clinical Translational Research Building (CTRB)

Lunch will be provided

Learning Objectives: At the conclusion of this presentation, participants should be able to

1. Illustrate the electrophysiological (cognitive ERP) abnormalities characteristic of early Alzheimer’s disease (AD) and Fragile X-Associated Tremor Ataxia Syndrome (FXTAS).
2. Interpret how abnormalities of synaptic function are central to 2 late-life neurocognitive disorders: Alzheimer’s disease (AD) and Fragile X-Associated Tremor Ataxia Syndrome (FXTAS).
3. Recognize the current NIA-Alzheimer Association criteria for the 3 phases of Alzheimer’s Disease: AD dementia, MCI, and Preclinical AD.

CME Information:

Accreditation:
The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit:
The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. The VA designates 1.0 hour of Continuing Education credit provided for its employees. Series #5120
