“Role of clock-enhancing small molecules in metabolic syndrome and aging”

Presented by

Dr. Zheng Chen

Monday, March 7, 2016
12:00 pm to 1:00 pm
Room 2161
Clinical Translational Research Building (CTRB)

Lunch will be provided

Zheng Chen, Ph.D.
Assistant Professor
Department of Biochemistry and Molecular Biology
University of Texas, Health Science School
Houston, TX

Learning Objectives: At the conclusion of this presentation, participants should be able to:

1. Demonstrate the association of dysfunctional circadian clocks and metabolic disease and aging;
2. Identify clock-enhancing small molecules (CEMs) in mouse models;
3. Evaluate the potential of CEMs in healthy aging

Dr. Chen has disclosed no relevant financial relationships. No one else in a position to control content has any financial relationship(s) to disclose.

CME Information:

Accreditation:
The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit:
The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. The VA designates 1.0 hour of Continuing Education credit provided for its employees. Series #6125
