

Clinical Translational Aging Research Seminar

Malcom Randall VA and University of Florida Institute on Aging

Sooyeon Lee, Ph.D.

Research Assistant Professor
Department of Surgery
University of Florida, Gainesville

“Critical role of Sirtuin 1-Mitofusin 2 axis in ischemia/reperfusion injury in aged livers”

Presented by

Dr. Sooyeon Lee

Monday, May 9, 2016

12:00 pm to 1:00 pm

Room 2161

Clinical Translational Research Building (CTRB)

Lunch will be provided

Learning Objectives: At the conclusion of this presentation, participants should be able to:

1. Describe cellular events in hepatocytes that underlie ischemia-reperfusion injury.
2. Describe how liver ischemia-reperfusion injury is affected by aging.
3. Enumerate multiple biological factors that contribute to age-related changes in ischemia-reperfusion injury.

Dr. Lee has disclosed grant/research support from NIH P30 AG028740 (Sub Project PI) and has no other relevant financial disclosures. No one else in a position to control the content of this activity has any financial relationships to disclose.

CME Information:

Accreditation:

The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit:

The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. The VA designates 1.0 hour of Continuing Education credit provided for its employees. Series #6125
