Learning Objectives: At the conclusion of this presentation, participants should be able to:

1. Describe cellular events in hepatocytes that underlie ischemia-reperfusion injury.
2. Describe how liver ischemia-reperfusion injury is affected by aging.
3. Enumerate multiple biological factors that contribute to age-related changes in ischemia-reperfusion injury.

Dr. Lee has disclosed grant/research support from NIH P30 AG028740 (Sub Project PI) and has no other relevant financial disclosures. No one else in a position to control the content of this activity has any financial relationships to disclose.

CME Information:

Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit: The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. The VA designates 1.0 hour of Continuing Education credit provided for its employees. Series #6125
