Learning Objectives: At the conclusion of this presentation, participants should be able to:

1) Describe the emerging pandemic of Alzheimer’s disease and related dementias and the challenges it presents for patients, families, healthcare providers/systems and general society.
2) Identify the benefit of diagnosis and the challenges of diagnosis and ongoing management of Alzheimer’s disease and other related chronic dementing illnesses, including the common associated complications and co-morbid conditions.
3) Define the challenges facing family caregivers, recognize the impact of chronic stress on their health, and describe strategies for supporting them.
