“Understanding of neuronal intrinsic mechanisms of axon regeneration: Lessons from C. elegans”

Presented by
Sung Min Han, PhD

Sung Min Han, PhD
Postdoctoral Associate in Genetics,
Department of Genetics,
Yale University,
New Haven, CT

Monday, March 26, 2018
12:00 pm to 1:00 pm
UF, Clinical Translational Research Building (CTRB),
2004 Mowry Rd, Room 2161
Lunch will be provided

Learning Objectives: At the conclusion of this presentation, participants should be able to:
1) Describe how mitochondria support axon regeneration.
2) Discuss how the DLK1 MAP Kinase pathway regulates mitochondrial behaviors in neurons.
3) Explain the role of genetic model organisms in understanding and treating aging-associated neuronal disorders.

Dr. Han has disclosed no relevant financial relationships. No one else in a position to control content has any financial relationship(s) to disclose.

CME Information:
Accreditation:
The University Of Florida College Of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.
Credit:
The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
The VA designates 1.0 hour of Continuing Education credit provided for its employees.
Series #8115
