Looking to add more antioxidants to your life? This study may be for you.
The REVIVE Study

The REVIVE study observes the powerful effect of the antioxidant resveratrol. We aim to study the effect this supplement, naturally found in red wine and grapes, has on the physical function of minority adults, ages 65 and older.

We want to:
- Observe your well-being for a 90-day period, while taking the supplement
- Measure a small biopsy of your thigh tissue
- Evaluate your physical performance throughout this process

Participants will receive:
- Up to a $700 gift card as compensation for participating in and completing the study
- Complimentary parking
- Complimentary coffee and snacks
- Additional benefits include: blood tests, physical and mental evaluations

To see if you qualify, please call 352.273.5919 or toll-free at 866.386.7730.
